60 Years of Experience & Trust

McLellan Industries is the original designer of the Mill Liner Handler. Our experience and support are well known throughout the world.

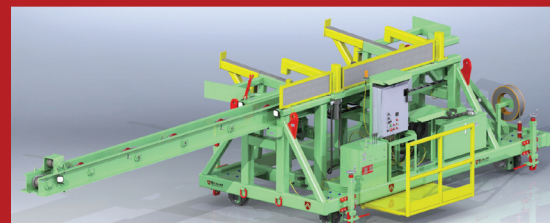

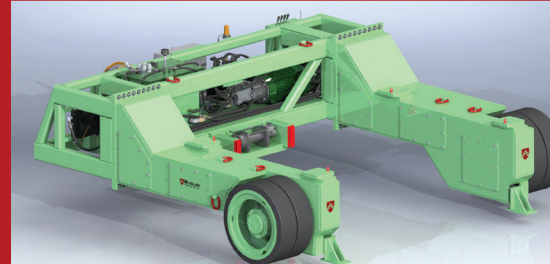

With over 60 years of research and development experience, we custom engineer and manufacture quality-built equipment for servicing Ball, Sag, Ag and Rod type mills. This equipment is essential for scheduled or emergency relines.

Our McLellan Mill Relining Equipment significantly reduces mill downtime while providing a maximum level of safety. Our equipment empowers your crew with a mechanized delivery of mill liners for easy transport and placement inside your mill. Let us help you with all aspects of the mill lining process. We can provide you with a custom reline service package designed to meet your needs.
